

TECHNICAL DATA SHEET

KRASOflex[®] Bentonit Expansion Joint Tape

Application areas

For the sealing of internal construction joints in concrete elements with high water ingress resistance against pressurised and non-pressurised water, as well as against ground moisture.

Technical details

- + Strong, quick and reliable swelling reaction in contact with water
- + High dimensional stability
- + Suitable for water exchange zones

Tests

- + With general building authority test certificate (ABP)
P-MPA-BS-240020
- + DafStB waterproof concrete guideline: stress class 1 + 2

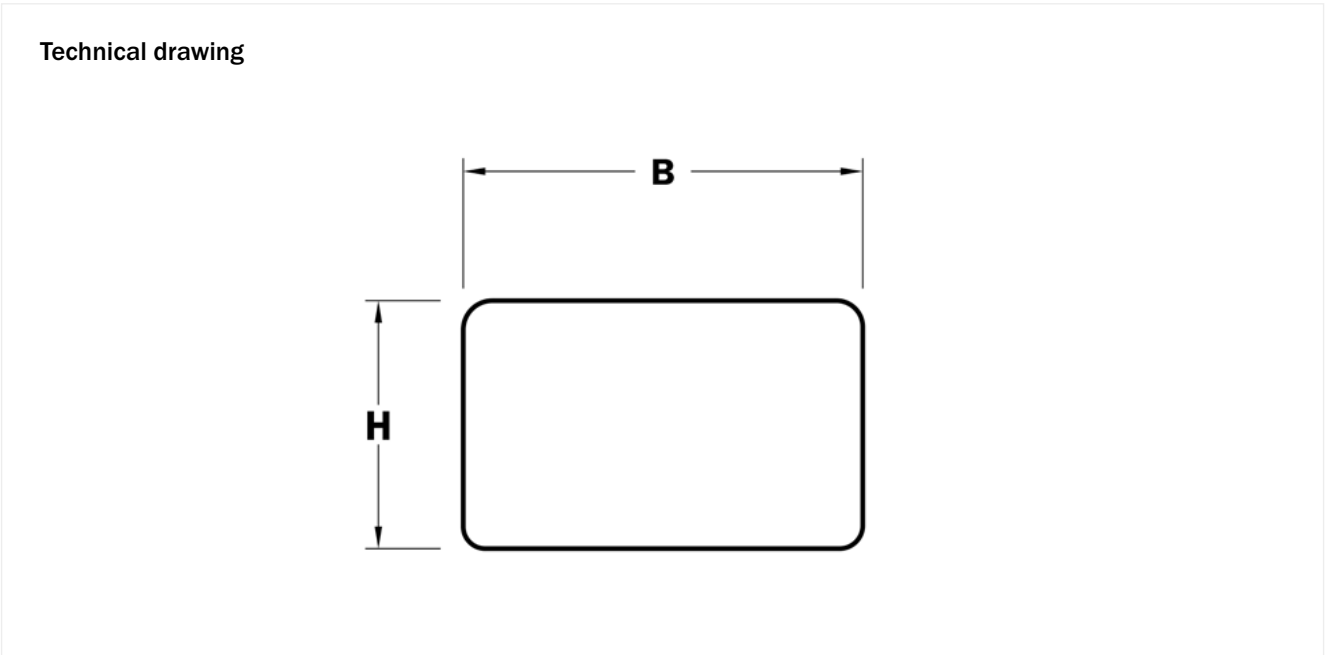

Material

Expansion joint tape | Bentonite and butyl rubber

TECHNICAL DATA SHEET

KRASOflex[®] Bentonit Expansion Joint Tape

H = height | B = width

Item	H (mm)	B (mm)	Roll length (m)	Weight (g/m)	Item no.
Bentonit Expansion Joint Tape	20	25	5	830	KBQ2025

Storage

3 years, if stored in a frost-free, weather-protected place

Processing

According to general building authority test certificate (ABP) P-MPA-BS-240020 and installation instructions **KRASOflex[®]** Bentonit Expansion Joint Tape
